Google Apps for In-class Assessment
(Kahoot, Plickers, etc.)
Reflective Practice Large Group Meeting
Wednesday, March 22, 2017
3:30 to 5:00 p.m. in the HUB Monongahela Room.

Have you ever wondered if your students were ‘getting it’ and wished you had a way to quickly assess their understanding? Thanks to several Google apps, you can now survey the class and have the results analyzed in an instant. Kahoot, Plickers, Socrative, and Google Forms are fun, powerful tools that will change the way that you gauge your students’ knowledge. Presenter: Dr. Brian Sharp, Mathematics Department

Articles available through IUP Libraries

Future Large Group Meetings

- **Dual Enrolled Undergrad/Grad Classes: Meeting Everyone’s Needs & Maintaining Your Sanity.** Presenters from the different colleges on campus will discuss how they develop and manage their dual enrolled classes to meet the needs of undergraduate and graduate students in their various disciplines. **Presenters:** Lara Homer Messy (Anthropology); John Chrispell (Mathematics); Linda Jennings (Music). Thursday, April 20, 2017. 3:30 – 5:00 PM. Monongahela Room, HUB.

Using Google Apps or other Programs Reminder

This is a reminder that while there is not a prohibition on the use of Google Apps/programs by IUP faculty, Google has consistently been unwilling to agree to the Commonwealth’s terms and conditions. Therefore, when a student or faculty member agrees to a 'click through I agree' with Google, it is doing so as an individual and not binding IUP to those terms. The advice IT has received from PASSHE legal is that the faculty member could take personal liability if - for instance - a FERPA violation would occur using these tools. As a result, IT Services does not support Google usage and users are basically 'on their own' when they choose to use it. There is no intent to either create conflict or infringe on faculty academic freedom. This is for informational purposes to serve strictly as a caution.
